# we've got the painless outsourcing solutions you're looking for

TECHEAD manages and builds solutions for design chain processes. TECHEAD provides a complete turnkey solution, with skilled consultants, cutting edge technology and a proven production process.

Over the years TECHEAD has developed and built relationships with our clients on the partnerships that we have established with industry leaders such as Macromedia®, QuarkXPress®, Adobe® and Open Source products. Our success is directly related to our experience and the bonds made with our clients by getting to know their line of business and the corporate vision that guides them. From Fortune 500 companies to regional market leaders, TECHEAD can help your company manage your multi-channel branding strategies and track the results for growth.

## We deliver the total solution, not just one piece

TECHEAD outsourcing solutions are developed for you by our staff. Working closely with your team, we create the production model to define, enhance and expedite the design process while protecting and managing your company's brand.

We provide complete on-site project resources from project managers to creative tech support. TECHEAD professionals have extensive experience working on the client side with organizations such as yours. Your production challenges are addressed by skilled consultants who offer years of experience in the creative production processes. Our consultants deliver the knowledge, methods, and resources required to help you meet your organization's production goals that are driven by clearly-defined business objectives.

Our on-site outsource solution includes web-based project management software, the latest hardware and software installation, and data and image archives with back up to our off-site state-of-the-art data bunker.

We assist in every step, from defining your outsource requirements to delivering talent capital. Our scalable, flexible talent solutions incorporate innovative methods, performance metrics, and proprietary web-based technology. Our approach allows us to deliver solutions faster, accurately, and at lower costs than other options available in the talent-production industry.

The process is customized to meet your specific business goals and objectives in the most efficient, cost-effective way to deliver your multi-channel brand strategies. Our cutting-edge approach to creative brand management merges with our process knowledge and with our proven technology methods.

Our solution is a consultative process; we don't simply enter your organization and "push jobs" using a technology clutch. Our outsource solution designs and implements a process model that views your corporate brand from a proactive perspective, not a reactive model. We analyze and test each process so that it meets your rigorous brand identity specifications and will encourage your managers to embrace our people as part of your team.

When combined with our proprietary web-based tool that assesses projects and manages the complete production process, we deliver one of the most comprehensive creative production solutions available today. Our resources, processes, and tools allow us to move through the line of business and production process efficiently, delivering the projects you need when they are needed — correct the first time and on time.

TECHEAD's turnkey staffing solution provides three options for developing effective workforce strategies: Flexible short and long term contract staffing, creative personnel with equipment, and total creative on-site outsource solutions. These services are available individually or as a total creative package.

### About TECHEAD

TECHEAD provides creative talent and information technology staffing services, multimedia and graphics software training, and creative business solutions. We are a certified small woman owned business and are headquartered in Richmond, Virginia. We've built our reputation on building strong client relationships for over 17 years.

TECHEAD has been a Richmond "Rising 25" honoree four times in a row. We were also named as a "Fantastic Fifty" Company in the State of Virginia for 2000 and 2001. Also in 2001, we made the "Purple Squirrel 100," an exclusive ranking of 100 of the fastest-growing IT staffing/services firms in the United States. And in 2002, we were honored to be included on Inc. Magazine's "Inner City 100" list, recognizing America's fastest-growing urban businesses, and we also received a Better Business Bureau Torch Award for outstanding business ethics.
